

# Dylan Latimer

Full-Stack Web Developer

✉ dylanrlatimer@gmail.com ☎ 1-(873)-200-9495 🌐 [dylanlatimer.ca](https://dylanlatimer.ca)

## SUMMARY

---

Self-taught full-stack web developer specializing in React/Next.js and Supabase/Firebase. Solo built and deployed a social platform with a feed, profiles, realtime market data, brokerage integration, automated moderation, admin tooling, and much more.

## EXPERIENCE

---

### Founder / Full-Stack Developer

March 2025 – December 2025

Equivox

- Designed and implemented full-stack web application using Next.js, TypeScript, and Supabase
- Built real-time features using WebSockets for live market data and notifications
- Designed relational database schema (25+ tables) with row-level security policies
- Integrated third-party APIs (Plaid, Finnhub) for financial data and account linking
- Implemented authentication, role-based access, and protected routes
- Developed media upload and processing pipeline using AWS services
- Built scalable data-fetching layer using RTK Query

### Sales Associate → Assistant Manager

August 2023 – March 2025

Shell

- Promoted to assistant manager within 7 months
- Automated various Excel flows using Python web scrapers and Excel macros
- Maintained internal spreadsheets for tracking expenses, inventory, and daily operations
- Oversaw inventory and ordering for lottery and cash supplies, maintaining accurate stock levels
- Ensured pricing accuracy across internal systems and physical tags

## EDUCATION

---
